Site Evaluation

Please send the following information to assist in selecting the best system for your site.

1. Head, or drop in elevation from source to turbine site
2. Flow in gallons per minute to be used
3. Length, size, and condition of pipe to be used (perhaps a simple sketch)
4. Distance from turbine to point of power use
5. Desired system voltage (12v, 24v, or 48v)
